

Quality Policy

MCV Microwave East, Inc.

MCV employees are committed to meet the expectations of our internal and external customers and to continually improve our QMS based on AS9100D while meeting all statutory and regulatory requirements.

MCV Microwave developed and implemented a Quality Management System in order to document the company's best business practices, better satisfy the requirements and expectations of its customers and improve the overall management of the company.

The Quality Management System of MCV Microwave meets the requirements of the international standard SAE AS9100D. This system addresses the design, development and production of the company's products. The system is suitable for post-delivery support, including the provision of maintenance, spare parts or materials for the company's products.

The manual is divided into eight sections that correlate to the Quality Management System sections of AS9100D. Each section begins with a policy statement expressing MCV Microwave's obligation to implement the basic requirements of the referenced Quality Management System section. Each policy statement is followed by specific information pertaining to the procedures that describe the methods used to implement the necessary requirements.

This manual describes the Quality Management System, delineates authorities, inter relationships and responsibilities of the personnel responsible for performing within the system. The manual also provides procedures or references for all activities comprising the Quality Management System to ensure compliance to the necessary requirements of the standard.

This manual is used internally to guide the company's employees through the various requirements of the AS9100D standard that must be met and maintained in order to ensure customer satisfaction, continuous improvement, risk-based strategies (PDCA), and to provide the necessary training and instructions that create an empowered work force.

This manual is used externally to introduce our Quality Management System to our customers and other external organizations or individuals. The manual is used to familiarize them with the controls that have been implemented and to assure them that the integrity of the Quality Management System is maintained and focused on customer satisfaction and continuous improvement.
